MEMORANDUM

Date: September 03, 2004

Subject: Contract Laboratory Program Data Review

From: *Marvelyn Humphrey*, Marvelyn Humphrey, ESAT Regional PO, 6MD-HE

To: V. Malott, 6SF-AP

Site : JONES ROAD GROUND WATER PLUMECase#: 33186SDG# : F12K1

The EPA Region 6 Houston Branch ESAT data review team has completed a review of the submitted Contract Laboratory Program (CLP) data package for the referenced site. The samples analyzed and reviewed are detailed in the attached Regional data review report.

Please note that the quantitation limits for all compounds of concern were qualified as unusable for samples F1292 and F1304 because of extremely poor DMC performance.

If you have any questions regarding the data review report, please call me at (281) 983-2140.

MEMORANDUM

DATE: September 2, 2004
TO: Marvelyne Humphrey, ESAT PO, Region 6
FROM: Tom C.H. Chiang, ESAT Program Manager, Region 6 *Jacy N.*
SUBJECT: CLP Data Review
REF: TDF # 6-04-217A ESAT # O-0555
 ESAT Contract No. 68-W-01-030

Attached is the data review summary for Case # 33186
 SDG # F12K1
 Site Jones Road Ground Water Plume

COMMENTS:

I. CONTRACTUAL ASSESSMENT OF THE DATA PACKAGE

CCS and hardcopy reviews detected the contractually noncompliant item below.

The number of DMC recoveries outside the QC limits exceeded the maximum allowed by the SOW for samples F1292 and F1304 (OLC03.2; D-41/VOA, 11.4.4 and D-42/VOA, 11.5.1). The laboratory performed additional reanalyses for both samples which confirmed the matrix effect. However, the laboratory reported the reanalysis results for samples F1292RE and F1304RE without contacting the CLP PO (OLC03.2; D-42/VOA, 11.5.4).

II. TECHNICAL USABILITY ASSESSMENT OF THE DATA PACKAGE

The total number of sample results reviewed was 1,050 for this data package. Some results were qualified for technical problems, and the significant problem is addressed below.

Poor DMC performance caused the qualification of 26 results as unusable for samples F1292 and F1304.

III. OTHER AREAS OF CONCERN

Trip blank sample F12Y4 and field blank sample F12Z3 contained methyl tert-butyl ether at 3.8X the CRQL for OLC03.2.

NA = Not applicable.

ACTION ITEMS:

AREA OF CONCERN: Contractual Issue The laboratory reported the reanalysis results for two samples without contacting the CLP PO. Technical Issues Poor DMC performance caused some unusable result qualifications for samples F1292 and F1304. Some results were qualified because of laboratory or field contamination.

NOTABLE PERFORMANCE:

COMMENTS/CLARIFICATIONS
REGION 6 CLP QA REVIEW
Jones Road
CASE 33186 SDG F12K1 SITE Ground Water Plume LAB SHEALY

The following is a summary of sample qualifiers used by Region 6 in reporting this CLP data:

No.	Acceptable	Provisional	Unacceptable
VOA	14	6	

COMMENTS: This SDG, contracted under Low Concentration SOW OLC03.2, consisted of 20 water samples and 1 PE sample for VOA analysis. The OTR/COC Records did not designate a sample for laboratory QC, so the laboratory chose sample F12K3 for this purpose and notified SMO. The sampler designated sample F13E2 as the PE sample, sample F12Y4 as the trip blank, and sample F12Z3 as the field blank. The RSCC verified that samples F12B4 and F1245, both from SDG F12G9, were the field duplicates of samples F1304 and F1305, respectively. The data package was on time for the contractual seven-day turnaround requirement but contained the contractually noncompliant item below.

- The laboratory reported the reanalysis results for two samples without contacting the CLP PO.

The TDF requested that this package be reviewed at level 2 review. The target compounds of concern with the user's desired detection limits in parentheses were vinyl chloride (2 µg/L), trans-1,2-dichloroethene (7 µg/L), cis-1,2-dichloroethene (7 µg/L), and tetrachloroethene (5 µg/L). All samples met the desired detection limit criteria except that the QL's for all compounds of concern were qualified as unusable for samples F1292 and F1304 because of extremely poor DMC performance. The Compounds of concern were detected at various concentrations in five samples, but the only concentrations above the desired detection limits were those for tetrachloroethene in samples F12S8, F12T6, F12T9, and F1259.

The only target compounds not designated as compounds of concern that were detected at concentrations above the CRQL's in the samples were chloroform, trichloroethene, 1,2-dichloropropane, laboratory contaminant toluene, and field/trip contaminants acetone and methyl tert-butyl ether. Samples F1292 and F1304 had poor DMC performance. The reanalyses had similar problems, demonstrating matrix effect. The original analysis results were designated for use unless otherwise specified. The extremely poor DMC performance caused unusable result qualifications for samples F1292 and F1304.

**ORGANIC QA REVIEW
CONTINUATION PAGE**
Jones Road
CASE 33186 SDG F12K1 SITE Ground Water Plume LAB SHEALY

The PE sample results were generally acceptable. Please note that the PE sample was not subject to laboratory QC evaluation because it constituted a QC parameter. The PE sample, therefore, was not included in the table above summarizing data usability.

Six field samples were provisional because of problems with laboratory contamination, field contamination, and/or DMC recoveries. The technical usability of all reported results is indicated by ESAT's final data qualifiers in the Data Summary Table (DST). An Evidence Audit was conducted for the Complete Sample Delivery Group File (CSF), and the audit results were reported on the Evidence Inventory Checklist.

NOTE: THE FOLLOWING REVIEW NARRATIVE ADDRESSES BOTH CONTRACTUAL ISSUES (BASED ON THE STATEMENT OF WORK) AND TECHNICAL ISSUES (BASED ON THE NATIONAL FUNCTIONAL GUIDELINES). THE ASSESSMENT MADE FOR EACH QC PARAMETER IS SOLELY BASED ON THE TECHNICAL DATA USABILITY, WHICH MAY NOT NECESSARILY BE AFFECTED BY CONTRACTUAL PROBLEMS. THE ASSESSMENTS ARE DEFINED BELOW.

Acceptable = No results were qualified for any problem associated with this QC parameter.

Provisional = Some results were qualified because of problems associated with this QC parameter.

Unusable = All results are unusable because of major problems associated with this QC parameter.

1. Holding Times: Acceptable. The PE sample was exempt from holding time and preservation requirements. All other samples were analyzed within the contractual and technical holding time limits, and pH values indicated that these samples were preserved with acid.

NOTE: Polymerization of vinyl chloride and styrene is likely to occur in acid-preserved samples and could cause low biased results for these analytes.

2. Tuning/Performance: Acceptable. BFB analyses met GC/MS tuning criteria.

3. Calibrations: Acceptable. Target analytes met contractual calibration criteria. Methylene chloride failed the technical %RSD calibration criteria but was not detected in the associated samples, so qualification of the associated results was not required per Region 6 guidelines.

**ORGANIC QA REVIEW
CONTINUATION PAGE**
Jones Road
CASE 33186 SDG F12K1 SITE Ground Water Plume LAB SHEALY

4. Blanks: Provisional. The method and storage blanks met the contractual QC guidelines although the blanks contained chloromethane, trichlorofluoromethane, 1,1,2-trichloro-1,2,2-trifluoroethane, acetone, methylene chloride, tetrachloroethene, and/or several aromatic compounds at various concentrations. With the exception of benzene, the contaminants detected in the storage blank were most likely introduced during the analysis, not sample storage. The effects of the laboratory contamination are summarized below.

- The concentrations above the CRQL's for tetrachloroethene in sample F1243 and toluene in samples F12S8 and F12T6 were qualified as biased high (reviewer "B" flag).
- All field sample results below the CRQL's with laboratory "B" flags should also be considered undetected and were flagged "U" at the CRQL's on the DST.

Trip and Field Blanks: Both field QC samples contained methyl tert-butyl ether at concentrations above the CRQL. The field blank sample F12Z3 contained acetone at a concentration below the CRQL. The effects of this shipping and field contamination are summarized below.

- The acetone results above the CRQL for samples F1259 and F1292 were qualified as undetected ("U"), and the concentrations should be used as raised QL's ("M").
- The acetone results below the CRQL in all field samples should be considered undetected and were flagged "U" at the CRQL's on the DST.

5. Deuterated Monitoring Compounds (DMC's)/Surrogates:

Provisional. Samples F1292 and F1304 had more than the contract-allowed number of DMC recoveries outside the QC limits. The laboratory performed additional reanalyses for both samples which confirmed the matrix effect. The QL's were unusable for vinyl chloride, trans-1,2-dichloroethene, cis-1,2-dichloroethene, trichloroethene, cis-1,3-dichloropropene, toluene, trans-1,3-dichloropropene, 1,1,2-trichloroethane, tetrachloroethene, ethylbenzene, total xylenes, styrene, and isopropylbenzene in samples F1292 and F1304 because the associated DMC recoveries were extremely low (less than 20 percent).

Although contractually acceptable, the VDMC12 and/or VDMC13 recoveries were below the QC limits for samples F12K1, F12K3, and F12K3MS. The reviewer verified that the low VDMC12 recovery in the MS sample did not affect the assessment of MS/MSD results.

**ORGANIC QA REVIEW
CONTINUATION PAGE**
Jones Road
CASE 33186 SDG F12K1 SITE Ground Water Plume LAB SHEALY

The rest of the outlying DMC recoveries were only marginally below the QC limits, so result qualification was unnecessary in the reviewer's opinion.

6. Matrix Spike/Matrix Spike Duplicate/Laboratory Control Sample (MS/MSD/LCS): Acceptable. The MS/MSD results met the QC criteria for precision and %recovery.

7. Other QC:

Field Duplicates: Acceptable. All field duplicate results were consistent.

PE Sample: Acceptable. According to the score report, all PE sample results were within the warning limits. The report indicated that the laboratory missed the spiked TIC 2,2-dichloropropane which, in the reviewer's opinion, did not affect the target analyte results. Cis-1,2-dichloroethene, identified in the report as a non-spiked TIC, was detected at a concentration below the CRQL in the PE sample and at various concentrations in several field samples. In the reviewer's opinion, the detected cis-1,2-dichloroethene results in the field samples should be used with caution due to possible laboratory contamination. Several other compounds identified in the report as non-spiked TIC's were actually target analyte laboratory contamination addressed in Section 4 above.

8. Internal Standards (IS): Acceptable. IS performance was acceptable for all analyses.

9. Compound Identity (ID)/Quantitation: Acceptable. Target compounds detected at concentrations above the CRQL's in the field samples were chloroform, cis-1,2-dichloroethene, trichloroethene, 1,2-dichloropropane, tetrachloroethene, laboratory contaminant toluene, and field/trip contaminants acetone and methyl tert-butyl ether. All reported sample results met compound identification criteria. Target compound 1,2-dichloropropane was detected at a concentration above the CRQL in sample F1292RE but was not detected in the original analysis. To favor the positive hit, the reviewer recommends using the 1,2-dichloropropane result from the reanalysis F1292RE.

10. Performance/Completeness: Acceptable. The data package was complete. The DST in this report is the final version.

**ORGANIC QA REVIEW
CONTINUATION PAGE**

Jones Road

CASE 33186 SDG F12K1 SITE Ground Water Plume LAB SHEALY

11. Overall Assessment: Fourteen samples were acceptable. Samples F1243, F1259, F1292, F12S8, F12T6, and F1304 were provisional because some results were qualified for problems with laboratory contamination, field contamination, and/or DMC recoveries. The QL's were unusable for 13 target compounds in samples F1292 and F1304 because of extremely low DMC recoveries.

HEADER DEFINITIONS FOR ORGANIC EXCEL DST

CASE: Case Number
SDG: SDG Number
EPASAMP: EPA Sample Number
LABID: Laboratory File/Sample ID
MATRIX: Sample Matrix
ANDATE: Sample Analysis Date
ANTIME: Sample Analysis Time
CASNUM: Compound CAS Number
ANALYTE: Compound Name
CONC: Compound Concentration
LABQUAL: Laboratory Qualifier
UNITS: Concentration Units
ADJCRQL: Adjusted Contract Required Quantitation Limit Value
CRQLLBL: Contract Required Quantitation Limit Label
SMPDATE: Sampling Date
VALDQAL: Region 6 Organic Data Validation Qualifier (see Organic Data Qualifier Definitions on the next page)
STATLOC: Station Location

Disclaimer: ESAT verified the accuracy of the information reported in the Excel DST only for the following data fields: CASE, SDG, EPASAMP, MATRIX, ANALYTE, CONC, UNITS, and VALDQAL. The data qualifiers in the VALDQAL column indicate the technical usability of the reported results.

ORGANIC DATA QUALIFIER DEFINITIONS

The following definitions provide brief explanations of the ESAT-Region 6 qualifiers assigned to results in the Data Summary Table.

- U** Not detected at reported quantitation limit.
- N** Identification is tentative.
- J** Estimated value.
- L** Reported concentration is below the CRQL.
- M** Reported concentration should be used as a raised quantitation limit because of interferences and/or laboratory contamination.
- R** Unusable.
- ^** High biased. Actual concentration may be lower than the concentration reported.
- v** Low biased. Actual concentration may be higher than the concentration reported.
- F+** A false positive exists.
- F-** A false negative exists.
- B** This result may be high biased because of laboratory/field contamination. The reported concentration is above 5X or 10X the concentration reported in the method/field blank.
- UJ** Estimated quantitation limit.
- T** Identification is questionable because of absence of other commonly coexisting pesticides.
- *** Result not recommended for use because of associated QA/QC performance inferior to that from other analysis.
- W** The result should be used with caution. The result was reported on a dry weight basis although the sample did not conform to the EPA Office of Water definition of a soil sample because of its high water content (>70% moisture).

2. Intact upon receipt?	<input checked="" type="checkbox"/>																																																																																																																								
FORM DC-2																																																																																																																									
3. Numbering scheme accurate?	<input checked="" type="checkbox"/>																																																																																																																								
4. Are enclosed documents listed?	<input checked="" type="checkbox"/>																																																																																																																								
5. Are listed documents enclosed?	<input checked="" type="checkbox"/>																																																																																																																								
FORM DC-1																																																																																																																									
6. Present?	<input checked="" type="checkbox"/>																																																																																																																								
7. Complete?	<input checked="" type="checkbox"/>																																																																																																																								
8. Accurate?	<input checked="" type="checkbox"/>																																																																																																																								
CHAIN-OF-CUSTODY RECORD(s)																																																																																																																									
9. Signed?	<input checked="" type="checkbox"/>																																																																																																																								
10. Dated?	<input checked="" type="checkbox"/>																																																																																																																								
TRAFFIC REPORT(s) PACKING LIST(s)																																																																																																																									
11. Signed?	<input checked="" type="checkbox"/>																																																																																																																								
12. Dated?	<input checked="" type="checkbox"/>																																																																																																																								
AIRBILLS/AIRBILL STICKER																																																																																																																									
13. Present?	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>																																																																																																																						
14. Signed?			<input checked="" type="checkbox"/>																																																																																																																						
15. Dated?			<input checked="" type="checkbox"/>																																																																																																																						
SAMPLE TAGS																																																																																																																									
16. Does DC-1 list tags as being included?	<input checked="" type="checkbox"/>																																																																																																																								
17. Present?	<input checked="" type="checkbox"/>																																																																																																																								
OTHER DOCUMENTS																																																																																																																									
18. Complete?	<input checked="" type="checkbox"/>																																																																																																																								
19. Legible?	<input checked="" type="checkbox"/>																																																																																																																								
20. Original?		<input checked="" type="checkbox"/>																																																																																																																							
20a. If "NO", does the copy indicate where original documents are located?	<input checked="" type="checkbox"/>
